WHY TRAIN WITH EA?

Enterprise Architects is a recognised leader in strategy and architecture training and consulting. Our team supports clients globally and has delivered architecture solutions for organisations across five continents.

The Certified Data Management Professional (CDMP) Certification is the only non-proprietary and internationally recognised management certification. The certification program was constructed by DAMA International and administered by the ICCP.

Our instructional design draws from leading contemporary methods and ensures a superior experience to alternative course offerings, which are often lecture-based and non-iterative.

THIS COURSE ADDRESSES THESE BUSINESS CHALLENGES

- › Data Development
- › Data Warehousing
- › Business Intelligence and Analytics
- › Data Operations and Security
- › Data Information Quality
- › Data Governance and Stewardship

This course is designed to provide you with the knowledge, methods and techniques to manage information as a valuable corporate asset within your organisation and yield real business results from it.

LEARNING GOALS

- › Understand the CDMP Certification process and the goal of "information professionalism"
- › Recognise the constituent disciplines of Information Management
- › Learn how to apply Information Management techniques to address business challenges
- › Become familiar with core Information Management enablers

CDMP CERTIFICATION REQUIREMENTS

- › Meet the experience and education qualifications: 2 years' experience for Practitioner Level, and 4 years' experience for Mastery Level
- › Attend the exam preparation course
- › Sign the ICCP Code of Ethics
- › Pass the IS Core Exam (included in this course)
- › Pass the Data Management Core Exam (included in this course)
- › Pass one specialty exam of:
 - › Data Development
 - › Business Intelligence & Analytics
 - › Data Operations & Security
 - › Data & Information Quality
 - › Zachman Enterprise Architecture Framework
 - › Integrated IT Project Management
 - › Data Governance & Stewardship
 - › Data Warehousing

Additionally participants in the course can sit a fourth examination at no additional cost, to retake or improve their score on one of the three examinations that were taken previously.

COURSE DETAILS

- › This course is delivered over 3 days in an interactive classroom environment
- › Available on demand – contact one of our learning services professionals to enquire about the course
- › Also available in-house for organisations by request
