

APPLIED OPERATING MODEL DESIGN

*How to deliver agile
Operating Models for
your business*

- + Understand how to make business strategy executable
- + Learn how to get stakeholder buy-in and implement change
- + Build, improve and evolve capabilities for the future

APPLIED OPERATING MODEL DESIGN

Learn how to design and implement an Applied Operating Model that will deliver outcomes that align to strategy, solve problems and fuel growth.

Applied Operating Model Design is a 4 day practical workshop that teaches you how to design a target operating model along with a transition plan that you can use to lead and drive business change in an organisation. The goal is to empower participants by providing them with the frameworks and skills to achieve measurable and sustainable outcomes in delivering operating model transformation.

The course is case study based with a team dynamic, designed to enable participants to connect, confer and collaborate with like-minded individuals from other organisations and business sectors.
